Workshop: Three Days Workshop and Microsoft Certification on "Web Development (Using HTML, CSS, Bootstrap, Angular JS, Java Script)"

BHARATI VIDYAPEETH'S COLLEGE OF ENGINEERING, KOLHAPUR

- **Department** : **Computer Science & Engineering**
- **Name of Activity** : Three Days Workshop and Microsoft Certification on “Web Development (Using HTML, CSS, Bootstrap, Angular JS, Java Script)”
- **Names of Coordinators** : Mrs. S. M. Mulla & Mr. V. U. Patil
- **Names of Resource Persons** : Mr. Parth Shukla , Corecode IT Solutions Pvt Ltd, Gurgaon
- **Date of Activity** : 7th, 8th and 9th Sept. 2018
- **Participants** : S. E., T. E. & B.E. Students
- **Details of Activity:**

Three days workshop and Microsoft Certification on “Web Development” organized **in collaboration with Corecode IT Solutions Pvt. Ltd., New Delhi** from 7th to 9th Sept. 2018. Mr. Parth Shukla, Corecode IT Solutions Pvt. Ltd., Gurgaon was resource persons of the training. All registered students of SE, TE and BE class were present. Training started with Lord Sarswati Poojan and Deep Prajwalan. Respected principal Dr. V. R. Ghorpade sir addressed all students about importance of value added courses which are organized in college for the benefit of their career. He also shared valuable information about growing use of web technologies in application development. Mrs. S. M. Mulla madam - Head of CSE dept., delivered speech in front of students with introduction of chief guests and also she explored the contents of the workshop which is focused on HTML, CSS, Bootstrap, Angular JS, Java Script. Faculty members of the department were also present for the inaugural function which is conducted in Computer Center. Mr. Parth Shukla discussed with students the upcoming opportunities in application development. Workshop was organized on Friday, Saturday, and Sunday of the week without hampering

academics of the students. Total 55 students of CSE department were participated in the workshop.

- **Outcome of Activity:**

Web Development Training by Core Code techno IT Solution is a 3/4- Day training program in the fields of HTML, CSS and Javascript. In this training program, Students learnt multiple web technologies that enabled them to create their own web projects. This training program is created by Microsoft's team of experts who have created dedicated E-Learning for on the go support for learners in terms of learning, mock test and assessments.

Web Development Training using HTML5, CSS3 and javascript
Build an e-commerce website from scratch.
Duration: 24hrs | Bundled with International
Certification from Microsoft on HTML5

About Web Development Training

Web Development Training by Core Code techno IT Solution is a 3/4- Day training program in the fields of HTML, CSS and javascript. In this training program, you will learn multiple web technologies that will enable you to create your own web projects. This training program is created by Microsoft's team of experts who have created dedicated E-Learning for on the go support for learners in terms of learning, mock test and Assessments.

You will learn through instructor led trainings for first 24hrs post that link for video tutorials will be shared. For a great hands-on learning experience, this training program is packed with assignments, assessment tests, code challenges, quizzes, and exercises. At the end of this training program, you will build an e-commerce/ website that will work seamlessly across different devices.

For doubt clearing, you would get 1 session on certification preparation with the trainer. You can also use the Q&A forum provided via Whatsapp group. Following are the detailed table of contents of this training:

About this course

This course provides an introduction to HTML5, CSS3, and JavaScript. This course helps students gain basic HTML5/CSS3/JavaScript programming skills. This course is an entry point into both the Web application and Windows Store apps training paths. The course focuses on using HTML5/CSS3/JavaScript to implement programming logic, define and use variables, perform looping and branching, develop user interfaces, capture and validate user input, store data, and create well-structured application.

The lab scenarios in this course are selected to support and demonstrate the structure of various application scenarios. They are intended to focus on the principles and coding components/structures that are used to establish an HTML5 software application.

Table of Contents

1. HTML & CSS: Learn HTML & CSS to build structure of web pages and to style them.

- Create the document structure by using HTML
 - Structure the UI by using semantic markup, including markup for search engines and screen readers, such as Section, Article, Nav, Header, Footer, and Aside; create a layout container in HTML
- Write code that interacts with UI controls

- Programmatically add and modify HTML elements; implement media controls; implement HTML5 canvas and SVG graphics
- Apply styling to HTML elements programmatically
 - Change the location of an element; apply a transform; show and hide elements
- Implement HTML5 APIs
 - Implement storage APIs and the Geolocation API
- Establish the scope of objects and variables
 - Define the lifetime of variables; keep objects out of the global namespace; use the "this" keyword to reference an object that fired an event; scope variables locally and globally
- Create and implement objects and methods
 - Implement native objects; create custom objects and custom properties for native objects using prototypes and functions; inherit from an object; implement native methods and create custom methods

Implement Program Flow (25-30%)

- Implement program flow
 - Iterate across collections and array items; manage program decisions by using switch statements, if/then, and operators; evaluate expressions
- Raise and handle an event
 - Handle common events exposed by DOM (OnBlur, OnFocus, OnClick); declare and handle bubbled events; handle an event by using an anonymous function
- Implement exception handling
 - Set and respond to error codes; throw an exception; request for null checks; implement try-catch-finally blocks

Access and Secure Data (25-30%)

- Validate user input by using HTML5 elements
 - Choose the appropriate controls based on requirements; implement HTML input types and content attributes to collect user input
- Validate user input by using JavaScript
 - Evaluate a regular expression to validate the input format; validate that you are getting the right kind of data type by using built-in functions; prevent code injection
- Consume data

- corecode
Techno
- 
- Consume JSON and XML data, retrieve data by using web services; load data or get data from other sources by using XMLHttpRequest

Use CSS3 in Applications (25-30%)

- Style HTML text properties
 - Apply styles to text appearance; apply styles to text font, including WOFF, @font-face, size, and understudy fonts; apply styles to text alignment, spacing, and indentation; apply styles to text hyphenation; apply styles for a text drop shadow
- Style HTML box properties
 - Apply styles to alter appearance attributes, including size, borders, rounded corners, outline, padding, and margin; apply styles to alter graphic effects, including transparency, opacity, background image, gradients, shadow, and clipping; apply styles to establish and change an element's position

At course completion

After completing this course, students will be able to:

- Explain how to use Visual Studio 2012/2012/another IDE to create and run a Web application.
- Describe the new features of HTML5 and create and style HTML5 pages.
- Add interactivity to an HTML5 page by using JavaScript.
- Create HTML5 forms by using different input types and validate user input by using HTML5 attributes and JavaScript code.
- Style HTML5 pages by using CSS3.
- Create well-structured and easily-maintainable JavaScript code.
- Use common HTML5 APIs in interactive Web applications.
- Create Web applications that support offline operations.
- Create HTML5 Web pages that can adapt to different devices and form factors.
- Enhance the user experience by adding animations to an HTML5 page.
