Subject: Permission for using college bus for S.Y.B.Tech. Students visit to RMC Plant, Shiye.

Respected Sir,

As a part of Shivaji University Syllabus for Concrete Technology subject in Civil Engineering it is mandatory to conduct a visit to RMC Plant. So, accordingly we are planning to visit Supertech RMC plant on 14th June, 2022. We have planned this industry visit for second year students of Civil Engineering of our college in order to give them an insight about the things work in the real life scenario.

There would be a total of 76 students accompanied by two faculty members from our college. For this purpose we require our college bus.

So it is a request to provide the college bus for the same.

Thanking you.

E-LEARNING QUALITY EVALUATION TOOL:

ASSESSING STUDENT ATTENTION USING ML APPROACH

E-learning is one of the trending features of educational data management systems nowadays. A novel approach to automatic estimation of attention of students during lectures in the classroom is one of the major analysis parts of E-learning systems to be implemented. The Main objective of our proposed system is to be detect the gestures of students while they are into a E-learning platform and analyze their level of attention onto the topic being taught. this analysis will be further used to track attendance and send to the teachers and respective parents

After completing the project, we shall consider a demonstration of the project and if it fits to our organization's requirements, we shall buy this project from students in the future. The expenses provided by us should be spent on the study materials, stationery and instruments required for establishing setup of the project.

Thanking You.

Plants become an important source of energy and only a primary source to the problem of global warming. The damage caused by emerging, re-emerging and endemic pathogens, is important in plant systems and leads to potential loss economically. In addition, Leaf diseases contribute directly and indirectly to the spread of human infectious diseases and environmental damage. As these diseases are spreading worldwide causing damage to the normal functioning of the plant and also damaging the financial condition by significantly reducing the quantity of Leafs grown. The Leaf production losses its quality due to much type diseases and sometimes they occur but are even not visible with naked eyes. Farmers estimate the diseases by their experience but this is not proper way.

After completing the project we shall consider a demonstration of the project and if it fits to our organization's requirements we shall buy this project from students in the future. The expenses provided by us should be spent on the study materials, stationary and instruments required for establishing setup of the project.

Thanking You.

Musical Instrumentation Simulation using Artificial Intelligence.

A new approach to sound design & modeling of musical multiple instruments is presented. An intelligent audio is presented. An intelligent audio system based on logic technique, javascript technique, is used to analyst acoustic recording, extract multiple sound feature & to process them to generate parameters for sound synthesis, mimicking human audio experts. Multiple musical instruments piano, guitar & drum. Main goal of our project is to investigate and develop artificial intelligence base techniques to capture and exploit audio expertise in the design & high quality sound, our principle aim is to automate as far as possible, the complex and time-consuming task & sound design for multiple musical instruments, try exploiting the experience and knowledge of professional such as multiple musical instruments manufactures, audio engineers and musicians.

"Education with Automation" system is a web application used to automate the education system. This system allows faculty to teach and students to learn using internet. Faculty can check the daily attendance and details of the students. When users get admitted into the institute, system automatically generates a code which will provided to the user as an QR code. The attendance will be taken by scanning the QR code. The system implements "E-learning" in which it provides study material for the user so that user can use this study material. Using this study material user can get the knowledge and he is able to prepare himself for the tests. This system automatically generates the users graph regarding their performance.

After completing the project we shall consider a demonstration of the project and if it fits to our organization's requirements we shall buy this project from students in the future. The expenses provided by us should be spent on the study materials, stationary and instruments required for establishing setup of the project.

Thanking You

"IOT Based Safety Helmet" We are developing the safety helmet for motorcycles. The ignition of the motorcycles will be avoided without helmet. It also consists GPS and GSM based tracking system in order to track location of accidents. The project is implemented with the use of sensors which will send the information to the module connected with the bike's engine. This helmet has two modules one is on bike and other is on helmet. Alcohol sensor, Accident detection sensor and force sensing register are fitted in the helmet. Second part consists of Relay and sensor which is fitted on bike. Therefore motorcycle will not start until it fulfills two conditions i.e. Bike rider should wear helmet and bike rider should not consume alcohol. If an accident occurs it sends the message (location/address) to the registered number.

After completing the project we shall consider a demonstration of the project and if it fits to organization's requirements we shall buy this project from students in the future. The expenses provided by should be spent on the study materials, stationary and instruments required for establishing setup of the project.

The project is basically based on IOT and ML based approach. The project is designed for paralysis patient, it is used to monitor the paralysis patient's health and detect the improvement within the patient's body. For paralysis patient it is necessary to take medicines at proper time so, medicine remainder is also provided here using IOT approach. Fall detection is a major challenge in the public healthcare domain, especially for paralytic patient as the decline of their physical fitness and timely and reliable surveillance is necessary to mitigate the negative effects of falls for this purpose we use ML approach.

After completing the project we shall consider a demonstration of the project and if it fits to our organization's requirements we shall buy this project from students in the future. The project is one of the android application which is based on the Domestic Services. Doormint provide us the various service details and it's service provider. In this app, domestic services like newspaper, milk, laundry, vegetables, plumber, hardware services, electrical services, automobile services, grocery, pundit etc. services are provided. Through app people get contact number of respected service provider. Customer can request to service through app from any location. They can get nearest service provider information. It saves time to go there and search service provider. Since it saves travelling cost to go there. It is more convenient for citizens.

After completing the project we shall consider a demonstration of the project and if it fits to our organization's requirements we shall buy this project from students in the future. - **Names of Coordinators** : Mrs. S. M. Mulla & Mr. V. U. Patil
- **Names of Resource Persons** : Mr. Parth Shukla and Mr. Nishant Singh, Corecode IT Solutions Pvt Ltd, Gurgaon
- **Date of Activity** : 23rd to 25th Feb. 2018 (30 Hrs.)
- **Participants** : S. E., T. E. & B.E. Students
- **Details of Activity:**

Three days workshop and Microsoft Certification on “Network Security” organized **in collaboration with Corecode IT Solutions Pvt. Ltd., New Delhi** from 23rd to 25th Feb. 2018. Mr. Parth Shukla and Mr. Nishant Singh, Corecode IT Solutions Pvt. Ltd., Gurgaon were resource persons of the training. All registered students of SE, TE and BE class were present. Training started with Lord Sarswati Poojan and Deep Prajwalan. Respected principal Dr. V. R. Ghorpade sir addressed all students about importance of value added courses which are organized in college for the benefit of their career. He also shared valuable information about Network Security. Mrs. S. M. Mulla madam - Head of CSE dept., delivered speech in front of students with introduction of chief guests and also she explored the contents of the workshop which is focused on Ethical Hacking and Network Security. All faculty members of the department were also present for the inaugural function which is conducted in auditorium. Mr. Nishant Singh discussed with students the upcoming opportunities in ethical hacking. Workshop was organized on Friday, Saturday, and Sunday of the week without hampering academics of the students. Total 81 students of CSE department were participated in the workshop.

- **Outcome of Activity:**

Students and faculty members were attended the training for three days which elaborates the topics like hacking psychology, operating system and hacking security, malwares, web server attacks, software reverse engineering very deeply. After completing the training successfully, Microsoft Certification exam was conducted for

registered candidates on 5th April 2018. These Certifications are very essential for final year students to upgrade their profile as well as technical skills. Students and trainers had healthy discussion to improve the overall practical knowledge of network security. They also had given valuable feedbacks to improve overall quality of workshop.

ABOUT THE TECHNOLOGY: Network security consists of the provisions and policies adopted by a network administrator to prevent and monitor unauthorized access, misuse, modification, or denial of a computer network and network-accessible resources. Network security involves the authorization of access to data in a network, which is controlled by the network administrator. Whereas Hacking is not about the illegal things, it's all about how to secure your system.

JOB MARKET: The job market for certified ethical hackers is quickly growing. The future job outlook for certified ethical hackers could be identified as "good," at worst. Many argue that this is the hottest and upcoming occupation of all IT career paths. That is because more transactions and processes are moving towards digital frameworks and away from older analog ways of life. That means more companies will be investing in securing their networks and identifying vulnerabilities.

CURRICULUM:

❖ **HACKING PSYCHOLOGY:**

- 1) Concept of Ethical Hacking: Legal or illegal?? Categories of Hackers (As per Knowledge)
- 2) Categories of Hackers (As per Working)
- 3) How to secure yourself from attackers?
- 4) How to stop attackers?
- 5) Indian Cyber Law

❖ **E-Mails: Exploitation And Security:**

- 1) What is an E-Mail?
- 2) Working of E-Mail?
- 3) Travelling of an E-Mail?
- 4) E-Mail servers
- 5) E-Mail Forgery and Spamming
- 6) Security to Anonymous Mailing
- 7) Attacks on E-Mail password
- 8) Securing the E-Mail passwords
- 9) E-Mail Forensics

❖ **OPERATING SYSTEM & HACKING SECURITY:**

- 1) Introduction to system software's
- 2) Windows Security Components and working
- 3) Introduction to Virtual Machines
- 4) Implementation of Virtualization
- 5) Windows
- 6) Linux
- 7) Attacks on Windows login password
- 8) Other Security Measures
- 9) Windows inbuilt Flaws & Security Loopholes
- 10) Invading Computer System

Project Title: **Er. Stuff**

An E-Commerce portal which will allow formal and informal merchants in developing countries to advertise and sell their goods on the internet...E-commerce is fast gaining ground as an accepted and used business paradigm. More and more business houses are implementing web sites providing functionality for performing commercial transactions over the web. It is reasonable to say that the process of shopping on the web is becoming commonplace.

The objective of this project is to develop a general purpose e-commerce store where students and teachers can sell and buy products like study, stationary materials and other materials related to students.

This website is a virtual store on the Internet where students and teachers can browse the catalog and select products of interest. The selected items may be collected in a shopping cart. At checkout time, the items in the shopping cart will be presented as an order. After successful ordering buyer can see contact information of seller so he can purchase a products directly from seller.

Thanking You.

Automation of Toll collection and Vehicle security

Now a days there is a huge rush in the toll plazas in order to pay the toll tax. Therefore in order to reduce the traffic jam and to save time, & also to reduce the money loss of 300 cores / year. We have designed project for the automation in toll tax payment using RFID. We are going to make the automation of toll plaza using combination of Android application, RFID, GSM.

The implantation of automation in toll plaza which is a step towards improving the monitoring of vehicles, travelling in predetermine routes.

The aim of our project is to design a system, which automatically identifies an approaching vehicles and record vehicles number and time. If the vehicle belongs to the authorized person, it automatically opens the toll gate and a predetermined amount is automatically deducted from its account through application. This translate to reduced Traffic congestion at toll plazas and helps in lower fuel consumption. This is very important advantage of this system.

Thanking You.
