Project Title: **Er. Stuff**

An E-Commerce portal which will allow formal and informal merchants in developing countries to advertise and sell their goods on the internet..E-commerce is fast gaining ground as an accepted and used business paradigm. More and more business houses are implementing web sites providing functionality for performing commercial transactions over the web. It is reasonable to say that the process of shopping on the web is becoming commonplace.

The objective of this project is to develop a general purpose e-commerce store where students and teachers can sell and buy products like study, stationary materials and other materials related to students.

This website is a virtual store on the Internet where students and teachers can browse the catalog and select products of interest. The selected items may be collected in a shopping cart. At checkout time, the items in the shopping cart will be presented as an order. After successful ordering buyer can see contact information of seller so he can purchase a products directly from seller.

Thanking You.

Regards,
