"Application of QR Code technology to automate ordering system in movie theaters."

Online food ordering is a process of ordering food from a movie theater through internet. A customer will search for a favorite food to buy, usually filtered via type of different combo and choose from available items and choose delivery.

This online food ordering system intends different types of forms with different of food varieties provides to user to buy online. Online food ordering system user can give order from theater and pay cash on delivery. With the use of QR code we going to buy food products.

Considering project requirements of the students, it might require huge expenses to be spent on it. After completing the project we shall consider a demonstration of the project and if it fits to our organization's requirements we shall buy this project from students in the future. The expenses provided by us should be spent on the study materials, stationary and instruments required for establishing setup of the project.

Thanking You.

Regards,
