The Project is **"Improving Database Security in Cloud Computing by Disintegration of Data"** which is actually an Cloud Computing Project based on online server system with AWS cloud storage facility. It is kind of innovative project in many terms and is surely going to help many organizations to store their sensitive data securely by fragmentation techniques, and to overcome the current problems of Data Leakage Mitigation,

After completing the project we shall consider a demonstration of the project and if it fits to our organization's requirements we shall buy this project from students in the future. The expenses provided by us should be spent on the study materials, stationary and instruments required for establishing setup of the project.

Thanking You.
