Disaster Management Cell

Introduction

A Disaster management is a collective term encompassing all aspects of planning for and responding to emergencies and disasters, including both pre- and post-event activities. It refers to the management of both the risk and the consequences of an event. It also covers preparation and necessary arrangements to look after any kind of disasters. In essence, disaster management is more than just response and relief; it is a systematic process aimed at reducing the negative impact and/or consequences of adverse events.

This cell makes essential and well prepared arrangements to safeguard and avoids severe hazards to human being as well as private, public properties.

Disaster categories:

1. **Natural Disaster**:- Earthquakes, Floods, Cyclone, Landslide, Tsunami etc.
